GEORGE KAMUNGE

Nairobi, Kenya | +254716980741 | kamungegeorge42@gmail.com | www.linkedin.com/in/george-kamunge-2a30a5233

OBJECTIVE

I am a skilled Fullstack Developer with expertise in JavaScript, TypeScript, PHP, and Laravel. I build scalable applications with a focus on both front-end and back-end development using technologies like React, Vue.js, Node.js, and Express. I have hands-on experience in testing, Docker, and implementing CI/CD pipelines to ensure efficient and reliable deployments. I am dedicated to delivering high-quality solutions while continuously improving my skill set.

EXPERIENCE

TEACH2GIVE, NYERI-KENYA   September-Present
QA-QE Fullstack Web Development Attachee
  • Learning full stack web development using JavaScript and TypeScript.
  • Designing and working on web development projects
  • QA-QE

PERSONAL PRACTICE   July 2023 - Present
Projects (Accessible via the portfolio website link)
  • Broadwrite: Developed a marketing website using React.js for Broadwrite, focusing on dynamic content rendering and seamless user interactions.
  • Multi-Step Form: Developed a multi-step form with dynamic validation and error handling using React.js. Demonstrates my ability to build complex user interfaces that handle multiple inputs across several steps.
  • Job Listings: A job listing application developed with Vue.js, TailwindCSS, and Express.js. Demonstrates proficiency in front-end frameworks and API development.
  • Mini-Testing Framework: A lightweight testing framework built from scratch in JavaScript, inspired by Jest. Enables the execution and reporting of test cases, providing a custom test runner and assertion methods.
  • OnedollarCV: A platform that allows users to create and download professional CVs for just $1. Leveraged Laravel for backend services, providing a secure, scalable architecture, and integrated A.I-based job suggestions.

EDUCATION

Dedan Kimathi University, Nyeri Kenya   Graduating [December, 2024]
Bachelor of Science in Computer Science
  • Completed a diabetes management system as my final year project using Laravel.

SKILLS

• Front-End Web Development: HTML, CSS, Sass, TailwindCSS, Javascript, React JS, Vue JS
• Back-End Web Development: Node JS, Express JS, PHP, Laravel
• Databases: MySQL, PostgresQL, Firebase, MongoDB
• Tools and technologies: Git & Github, Docker, Gitlab, Jest, Cypress, PHPUnit
